INSPIRATION

Funky Vol.2 is the second iteration of our cocktail menu, taking a deeper dive into nostalgic flavours inspired by music royalty, cult films, childhood favourites and timeless cocktail culture.

Staying true to our speciality of carbonated cocktails, the menu blends playful ideas with a modern approach to cocktail making, exploring flavour through techniques including distillation, infusion, clarification and carbonation to create drinks with balance, texture, depth and plenty of personality.

Some serves lean bright, fizzy and refreshing, others rich, silky and spirit-forward, but every cocktail is designed to feel bold, familiar and slightly unexpected all at once.

Funky Vol.2 is nostalgic drinking reimagined through a more contemporary lens, playful in spirit, serious in execution and built for whatever mood the night turns into.

And because nobody should miss out on the fun, we've also created an alcohol-free option within every section of the menu apart from Sub Zero, designed with the same attention to flavour, balance and experience as the rest of the list.
